

Nice try “Gabriel Embeha.”

A whole theater of people has been fooled and your trap has been set, or so you think.

I didn’t try to stop you all from seeing the film *Masks in the Sun* because you needed to see it to begin to understand what more is going on here.

In short, you are all unwillingly being made a part of the ongoing clandestine Pacific War, and I belong to a group of Michiganders who say to hell with the current United States of America, and its insane clandestine war.

Help me hack and undo Embeha’s war machine. Share your ideas and opinions with me and others at my social network [www.gabrielembeha.com](http://www.gabrielembeha.com)

I, and those like me need more than iPods and music, and we all need freedom. Apply for membership in the network. There’s my blog, explaining more there, as well as a blog specifically devoted to *Masks in the Sun*. It’s just a website, it’s free, and you will not be hassled in any way. We really do need your help.
